HOW TO JOIN THE ESCALATOR COMMUNITY

1 **Connect via the Slack workspace.**

Slack offers an easy way to ask questions, share resources, tell us about your upcoming events, and generally connect with the community

2 **Participate in a mentorship track.**

ESCALATOR aims to offer a wide variety of ways to learn and share digital and computational skills and resources for humanities and social sciences. Visit our digital champions page to learn more!

3 **Tell the world about your work.**

Rather than duplicating what exists, we want to highlight the work being done in South Africa around digital humanities and social sciences. You can showcase your publications, research, training, talks, and more via our website. Let us know how we can assist?

4 **Let us know what you need.**

We want to hear from you! Please tell us what you need to enhance your research and incorporate more digital/computational practices. You are invited to complete the short needs assessment or email us directly at escalator@talarify.co.za.

5 **Join a working group**

If you'd like to co-design any of the subprojects that form part of ESCALATOR, please consider joining a working group or get in touch to tell us how you'd like to collaborate.

TOWARDS AN ACTIVE AND INCLUSIVE COMMUNITY OF PRACTICE IN DIGITAL HUMANITIES AND COMPUTATIONAL SOCIAL SCIENCES IN SOUTH AFRICA
